WEDNESDAYS

ASTRONOMY TAKE 2

INSTRUCTOR: TRESSA LYONNE

GRADES: 3-6

During the first session, students began development of individual projects based on astronomy topics of their choosing. These projects can be as simple or as involved as necessary to convey their understanding of their topic. We conducted simple experiments to illustrate astronomy basics while developing these projects, but we certainly didn't cover everything! This session is a continuation of the first, but new additions are more than welcome. I provide a guided study of the topics students find interesting, and it turns out, there are more similar interests than not. There is plenty of time to develop new projects while working together to complete the others. Let's make toys that help us play with the stars!
